Niche Technology Proudly Participating in the 122nd Annual International Association of Chiefs of Police Conference and Exhibition

CHICAGO, IL -- Niche Technology Inc. provides a police Records Management System (RMS) designed specifically for large police agencies and police consortiums, and is proud to be exhibiting at the 122nd annual International Association of Chiefs of Police (IACP) Conference and Exhibition.

Our flagship product, NicheRMS, is a proven, cost-effective, Commercial Off-The-Shelf (COTS) software package that can manage all of a police organization's information in a single integrated system. NicheRMS has been successfully deployed in more than 100 police agencies worldwide, including 10 of the 30 largest police agencies in the English-speaking world.

"We are thrilled to be demonstrating NicheRMS at this year's IACP conference and expo," said Craig Hannah, Vice President of Sales and Marketing at Niche Technology. "We have a product that is unique in the current marketplace."

NicheRMS can operate as the definitive information system for all operational police officers and support personnel. Information can be accessed instantly and in real time, resulting in more efficient policing and increased safety, as crucial data can be provided to officers responding to calls in the field.

NicheRMS provides end-to-end police records management, from field reporting and management of investigations through to arrest, booking, charging and prosecution. The system's single, integrated database also manages all details of master index persons, addresses, vehicles, objects and events. All information is available within a single system, with no need for updates from other systems, and no need to maintain duplicate information in multiple systems.

Niche Technology provides a range of options for user access, including both mobile and desktop apps. Officers and administrative personnel can use the device and end-user app that best suits their needs to access the information and the features they need to do their jobs.

The IACP Conference and Exhibition runs from Saturday, October 24th through Tuesday, October 27th at McCormick Place in Chicago. More than 14,000 public safety professionals attend IACP to learn new techniques, advance their knowledge and careers, and equip their department for ongoing success.

About Niche Technology and NicheRMS

Established in 1992, Niche Technology serves 108,000 sworn officers worldwide through the Niche Records Management System (NicheRMS). The company's sole focus is the development, implementation, support and enhancement of law enforcement software. Niche Technology supports the specific requirements of policing to help ensure our system meets critical policing needs, especially in large police agencies. Niche RMS is used in more than 100 agencies, including 10 of the 30 largest police agencies in the English-speaking world. To learn more about Niche Technology, please contact us at info@NicheRMS.com or stop by booth #3821.
